Garden Design Studio

Planting Consultation Service

Planting Consultation Service

Take the guesswork out of planting and create a garden that thrives with expert guidance from our highly experienced Garden Design Team.

We will start with a site visit, where we will:

- walk through your garden together to discuss goals and planting possibilities
- advise on border sizes, layout ideas, screening, and any tricky areas
- note any soil improvement or irrigation needs (with follow-up guidance emailed afterwards)

The Heart Of The Service Is The Next Step

A visit to our Nurseries accompanied by a consultant to select plants that will be suited to your space, soil, and the environment. This ensures you get bespoke and expert-led choices that thrive in your garden.

Once your plants are chosen, we will provide advice on planting layout here at The Nurseries which will give you a clear, practical guide for planting focused on stock you have chosen with us.

Projects may be delivered in two phases:

1. Preparation & planning (site visit + soil/irrigation/preparation guidance)
2. Plant selection & plant layout advice (once borders are ready and stock is in season)

This is a planting advice only service and does not include a full garden design or extensive consultation report. Please refer to our Garden Design Service if your project is more complex.

With our friendly horticultural expertise you will set your garden up for lasting success and enjoy a planting scheme that is practical, beautiful, and ready to thrive.
